

2nd Gen A-series Embedded X86 All In One Panel PC

The whole machine adopts an ultra-thin frame that is more suitable for embedded installation, an all aluminum alloy structure, and a fanless totally enclosed design. It has more than 10.1"~23.8" sizes to choose from. The front panel is made of pure flat wire drawing process, which is dust-proof and waterproof, compact in shape, low in power consumption, and has good scalability, practicability, EMC compatibility and other performances. It is widely used in industrial control, military industry, communication, power, network, intelligent self-service terminal equipment and other automation applications.

Features >>

- The front frame is only 3mm thick, specially designed for embedded installation applications.
