

## IIoT Gateway con connessione VPN

Ewon Flexy è un internet data-gateway multifunzione che consente ai costruttori di macchine di monitorare e raccogliere KPI per analisi e manutenzione predittiva. Il servizio Talk2M VPN è incluso per la ricerca guasti del PLC remoto.

# Ewon Flexy

## IIoT Gateway con connessione VPN

Monitoraggio Dati in sede

Connettività da remoto

Raccolta dati per applicazioni IoT

### Connettività da remoto

- Accesso VPN da remoto per PLC troubleshooting
- Inclusa l'infrastruttura global cloud Talk2M
- setup semplice in pochi minuti per una connettività senza eguali

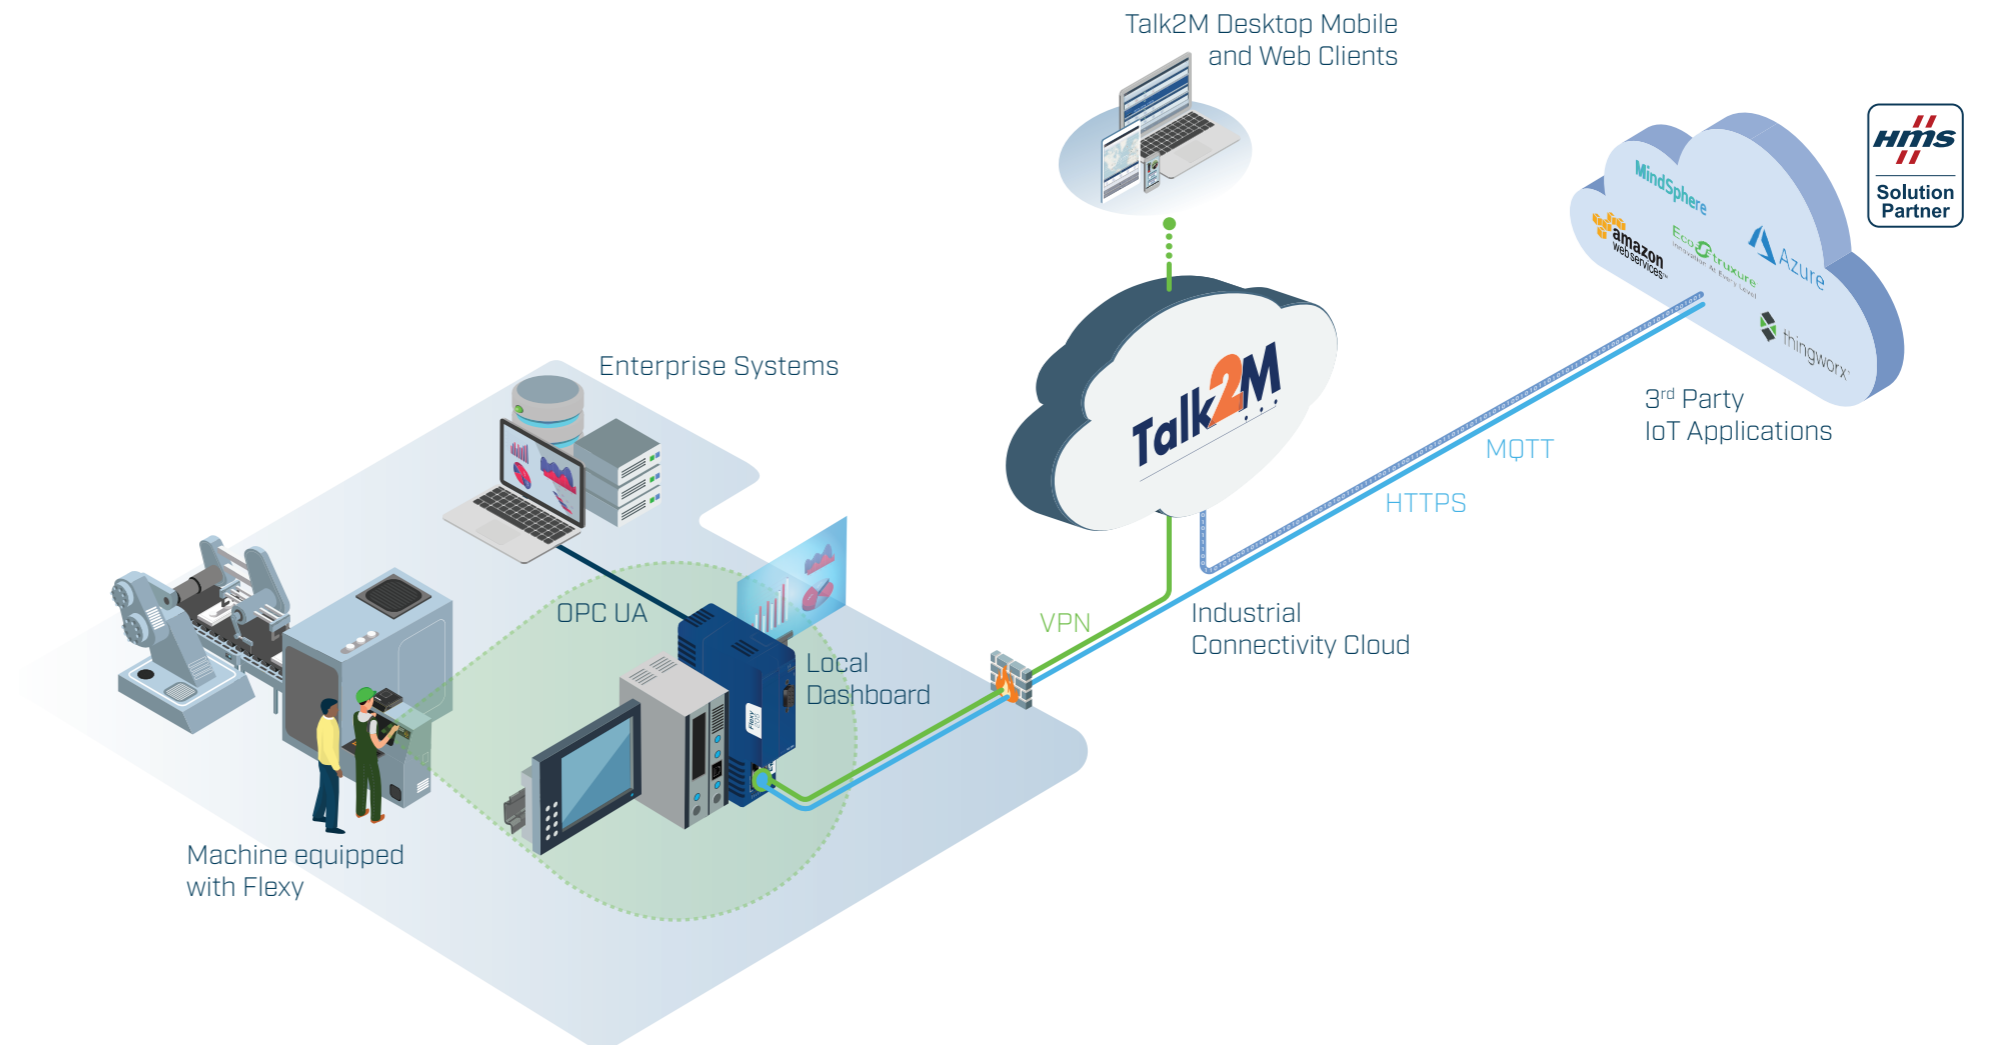

### Monitoraggio Dati in sede

- Supporta i più diffusi protocolli PLC per data logging e allarmi
- Web-dashboard locale per monitoraggio dei KPI tramite il servizio M2Web di Talk2m
- OPC UA server per condividere dati con sistemi Enterprise

### Raccolta Dati per applicazioni IoT

- Piena flessibilità nell'invio dati a qualsiasi server (locale o nel cloud)
- End to end solution with HMS Solution Partners' software (out of the box)
- Svariati IoT connectors, e MQTT/HTTPS tramite BASIC o JAVA script embedded
- Talk2M Data Services con API per l'integrazione con software di terze parti

## Proven with:

Rockwell Automation

SIEMENS

Schneider Electric

HITACHI Inspire the Next

MITSUBISHI ELECTRIC FACTORY AUTOMATION

OMRON

ABB

BECKHOFF

CROUZET

OPC UA

Modbus

... and many more

## Layered security approach

Talk2M ensures high security using a layered security approach called "Defense in Depth". This approach safeguards the integrity and confidentiality of data, along with availability and resilience of the information system.

The Information Security Management System of Ewon is yearly audited by independent organization and both Talk2M, the cloud solution and the gateways are regularly pen-tested by independent cyber security firm Nviso.

- Policy compliance
- Network infrastructure
- User and access management
- Traffic encryption
- Firewall
- Ewon device
